## **10 Hr OSHA Safety & Health Standards for General Industry**

The *General Duty Clause* of the Occupational Safety & Health Act of 1970 required employers to furnish a place of employment free from recognized hazards, and comply with occupational safety and health standards promulgated under the Act. This 10 hour program will provide an overview of OSHA's general industry standards and the requirements of the more frequently referenced standards.

## **DOT—Hazardous Materials Transportation 8 Hours**

This course is designed to satisfy the DOT requirements for employees involved in the shipping, receiving or transporting of hazardous materials as contained in Subpart H of 49 CFR 172. The training includes: general awareness/familiarization, function specific, safety and security responsibilities. Topics covered will include: hazardous material tables, shipping papers, marking and labeling, placarding, packaging, emergency information and security.

## **6 Hr—Biological Wastewater Review (Core Competency)**

This course is designed to comply with the continuing education requirements for renewal of biological wastewater certification. Specifically, the topics covered during this training will satisfy the requirement for 6 hours of training in the area of core competency. Topics include operations, troubleshooting, process control, and laboratory.

## **HAZWOPER Annual Refresher 8 Hours**

This training course is designed to satisfy the requirement for employees trained under 29 CFR 120 paragraph (q) to receive annual refresher training. Topics include review of the standard, PPE, hazard recognition and assessment, instrumentation and incident management.

## **RCRA—Hazardous Waste Management 8 Hours**

This course is designed to meet the annual RCRA training requirements in 40 CFR 262.34(a), 265.16 for initial or refreshed training. Topics include waste identification, on-site management, shipping, emergencies and releases, and treatment and disposal requirements.

## **HAZWOPER Emergency Response Operations Level 24 Hours**

This training is designed for employees responding to worksite releases at the Operations Level as defined in 29 CFR 120 paragraph (q). Training for employees who respond to contain and control in a defensive manner. Topics include control and containment techniques, hazard and risk assessment techniques, PPE selection and decontamination.

These courses can be presented at our facility or yours.
