

ROGERS & CALLCOTT ENGINEERS, INC.

AN EMPLOYEE OWNED COMPANY

Welcome Dr. Ron Dennis! Dr. Dennis has a PhD in Chemical Engineering and is a registered Professional Engineer with over 22 years in chemical and environmental engineering. He has worked as a local and state government environmental regulator, project engineer, research engineer, environmental consultant, chemical engineering assistant professor, and environmental/quality coordinator. He is a Certified Quality Engineer with the American Society for Quality.

Dr. Dennis's dissertation research focused on the oxidation of sodium cyanide in aqueous solutions by ultraviolet light and hydrogen peroxide. Dr. Dennis's past four years of air permitting experience of minor and major air pollution sources with a local government agency combined with his industrial and academic background give him a well-rounded perspective from which to address your environmental permitting and compliance issues.

Contact Dr. Dennis at: 864-232-1556
